

*Symposium on*  
**Quarks in Hadrons and Nuclei II\***

*September 15 - 20, 2003*

*Rothenfels Castle, Oberwölz, Austria*

A symposium devoted to the discussion of the various facets of QUARKS, as the basic constituents of strongly interacting particles, from low to high energies

***Topics:***

- Constituent quark models
- Structure functions of hadrons
- Spin structure of the nucleon
- Meson-baryon physics
- Chiral perturbation theory
- Diffractive processes and QCD
- Lattice gauge theory and hadronic dynamics
- Quark masses

***Sponsored by:***

- Dr. Wilhelm Heinrich Heraeus und Else Hereaeus Stiftung, Hanau
- Bundesministerium für Bildung, Wissenschaft und Kultur, Vienna
- Steiermärkische Landesregierung, Graz

***Organizing Committee:***

Chairmen: H. Fritsch, University of Munich  
W. Plessas, University of Graz  
Scientific Secretary: W. Schweiger, University of Graz  
Secretariat: G. Bodenmüller, University of Munich  
S. Fuchs, University of Graz
